IDENTITY THREAT INTELLIGENCE

xposeTIP

Identity Threat Intelligence

The threat is not the indicator. It's the person behind it.

Nexus Luxembourg 2026 — Cybersecurity Category

Nabil Ksontini — Founder

The Problem

The threat intelligence industry is drowning in noise.

100K+	95%	24h	0
IOCs ingested daily by a typical SOC	of indicators are noise or stale	average lifespan of an IP indicator	human context behind the data

---

The IP changes. The hash morphs. The domain rotates.

But the person behind them stays the same.

SOC analysts face alert fatigue. CISOs lack human context.
Compliance teams process IOCs without knowing who's behind them.

The Solution

One email in. Complete identity intelligence out. Two minutes.

DISCOVER

One email triggers a scan across 117 OSINT sources.
Social, breach, dev, gaming, DNS, archives.

117 sources scanned

→

ENRICH

Username expansion + name resolution.
Sanctions, PEP, corporate registries by resolved name.

40+ watchlists screened

→

IDENTIFY

9-axis behavioral fingerprint computed. Personas clustered. Identity graph built with PageRank.

9 behavioral axes

From noise to signal. From IOC to identity.

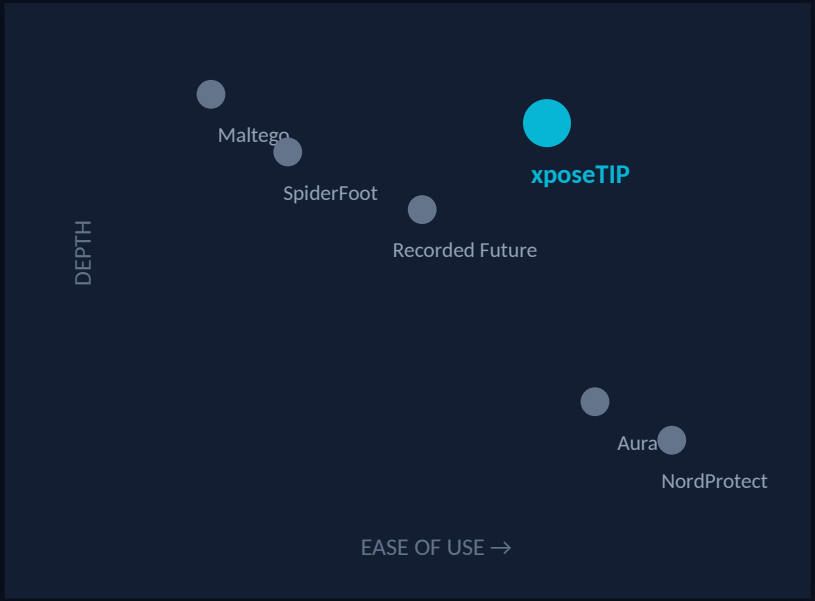
Built with FastAPI · Celery · PostgreSQL · Redis · React · D3.js · Docker

Market & Positioning

Market Opportunity

TAM	$223B	Global cybersecurity market 2028
SAM	$18B	Threat intelligence + OSINT market
SOM	$500M	Identity-centric threat intelligence

Where we sit



Deep OSINT expertise meets consumer-grade UX. No one else sits here.

$ Business Model

SaaS pricing. Land with free scans, expand to enterprise.

FREE

€0 forever

- → 5 quick scans / month
- → Basic exposure check
- → Limited sources (30)
- → No identity graph

PRO

€49 / month

- → Unlimited full scans
- → 117 sources + 3-pass pipeline
- → 9-axis behavioral radar
- → Identity graph + personas

ENTERPRISE

€299 / month

- → Multi-workspace + team
- → API access (SIEM/SOAR)
- → Sanctions & PEP screening
- → Custom scrapers + SLA

Revenue target: 100 Pro + 10 Enterprise = €95K ARR in Year 1

Why Me, Why Now

Nabil Ksontini

Founder & Builder

20+ years network & security engineering

ThreatConnect EMEA — daily threat intel ops

Master Mathematics — Sorbonne University

CCNA · NSE · JNCIA certified

Based in Luxembourg

Why now?

NIS2 & DORA
mandate identity-aware security for every EU organization

AI-native development
a solo founder can now build what took teams of 10

Breach epidemic
26B records leaked in 2024 alone — identity is the attack surface

Market gap
no one does identity-centric threat intelligence today

I built xposeTIP because I needed it. Every day at work, I see the gap.

The Vision

From investigation tool to the identity layer of the security stack.

v1 NOW

Investigation & Awareness

Email → identity report. Free self-service + enterprise.

→

v2 2026

API & Integration

REST API for SIEM/SOAR. Behavioral fingerprints as exportable indicators.

→

v3 2027

Behavioral Matching

Cross-persona pattern detection. "This account matches a known actor."

→

v4 2028

Behavioral Feeds

Firewalls block behaviors, not IPs. Real-time identity-based threat detection.

The identity layer the security stack is missing.

xpose TIP

IDENTITY THREAT INTELLIGENCE

xposeTIP

Identity is the new perimeter.

Beta customers

CISOs, red teams, compliance officers ready to test

Strategic partners

SIEM vendors, threat intel providers, SOC integrators

Investors

Pre-seed round to accelerate v2 API & go-to-market
